To Whom It May Concern,

Poelmann Chan Group has recently completed three projects on behalf of Fidessa Limited to support our expansion in Hong Kong.

- Design, build and project management of our 2,500 sq ft Disaster Recovery Facility.
- Design, build and project management of our new main office facilities covering 26,500 sq ft.
- Project Management of the re-instatement of our old office facilities covering 11,500 sq ft.

Each of these projects had unique challenges that Lynn and her team understood, approached and provided innovative solutions to.

A critical aspect of our engagement with Poelmann Chan was to involve them very early in the review of potential office locations. This allowed us to gain from their experience in making the best use of space and through the preparation of test fits allowed us to see more of the positives and negatives to each location. Following selection of the new space an excellent design concept was produced that reflected the design considerations of our new London headquarters whilst adding features unique to Hong Kong.

Our experience with Poelmann Chan was extremely positive, their teams were professional, positive, efficient, responsive and dedicated throughout all of the projects lifecycles bringing all projects in on-time and under budget.

We would highly recommend Lynn, Emily and team for interior design and project/build management services.

Sincerely,

Nevin Price
Regional Manager
